Print SMS to Mobiles Across the World

Free up your communications by using SMS Print.

SMS Print enables you to send any email, document, spreadsheet or other text via the Bond Wireless SMS Gateway to mobile phones across the globe. SMS Print is a special print driver that enables any application that is able to print to send information to a mobile phone.

So simple to use, send SMS in 3 easy steps from any Windows-based software:

1. Select **Print** from the menu options
2. Select **SMS Print** as the printer
3. Enter the destination number and hit **Send** to delivers the message instantly, easily and inexpensively to over 500 mobile networks globally.

SMS Print is great for sending small amounts of urgent information to people on the move:

- ✦ Need your lawyer to sign-off an urgent letter but he/she is out of the office? No problem, simply send it to his/her phone.
- ✦ Need to have a press release check by your manager? No problem, just send it to his/her phone.
- ✦ Forgotten that critical piece of information and you are already in the meeting? Never fear, have someone SMS Print it to you discretely.
- ✦ Need the contents of a clients order and you are out of the office? No problem, have someone SMS Print it to you.

Email and fax are great tools if you are in the office or have access to the internet. But when you are stuck in a meeting or are on the move they offer little benefit. With SMS Print, information can be sent to you discretely, inexpensively, efficiently and easily wherever you are on the global mobile network.

What can it offer?

- ✦ An inexpensive, immediate, efficient, and easy form of communication
- ✦ Minimum training required to enable sending of SMS from PC
- ✦ Easy integration to any Microsoft Windows program that can print
- ✦ Keep in contact with mobile staff

Who can it benefit?

- ✦ Field agents needing up to date information or status reports
- ✦ Anyone who needs to send critical text information to their personnel
- ✦ Anyone requiring the capability to communicate to mobile phones worldwide via Internet
- ✦ Anyone wishing an easy way to send documents to mobile phones
